

Valentina Marino

Front-End Developer

Creative, versatile, and passion-driven Front End Developer, with +4yr focus on web application development and 2yr in product design in multiple industries (IoT, retail, healthcare). I am proficient in crafting smooth interfaces with modern tech stacks, while striving to find new ways to combine this with my background in arts, industrial design and my desire to contribute to society.

Work Experience

Sept 2023 - Present

React Front-End Developer

Bravoure (Digital Agency Product & Estrategia)

React

Typescript

NextJS

REST API

GraphQL

Git

TailwindCSS

CraftCMS

I am responsible for building, maintaining, and expanding web applications from the ground up for a diverse clients & products, ranging from developing schooling platforms, music festival websites, to media streaming platforms. I focus on: translating codebases from JS into TS, enhancing user interfaces, optimizing performance, and ensuring seamless integration with backend, while collaborating with the design teams to scale the platform.

Oct 2022 - Sept 2023

React Front-End Developer

Autofill Technologies (Ai automated technologies)

React

Typescript

NextJS

REST API

Figma

Git

I maintain the customer dashboard and design components for a SaaS product in the automotive industry. Responsibilities include dashboard upkeep, bug fixes, and enhancing user experience. I collaborate with design teams to implement responsive, industry-specific interfaces, driving innovation in automotive technology.

Sept 2021 - May 2022

Web Developer (intern)

Routinely (E-commerce skincare)

React

Typescript

NextJS

REST API

TailwindCSS

I help develop Routinely's e-commerce storefront and manage its front-end. Responsibilities include translating design mock-ups into fully-responsive products and collaborating with UX designers, product managers, and back-end developers for an optimal user experience.

Jan 2020 - Nov 2020

Creative Researcher

Random Studio (Creative Agency)

AdobeSuite

I lead the cultural translation of fashion and new technology insights into design briefs for internal and client-facing projects, across digital and physical domains. Additionally, I fostered new partnerships with retail industry collaborators.

June 2018 - Apr 2019

IoT UX Researcher (intern)

Signify (Consumer products)

Figma

AdobeSuite

I developed a qualitative research and benchmarking method called Value Tuning. This method uncovers insights on how well a brand meets people's expectations. I provided evidence-based design recommendations to enhance the UX journey for HUE home products.

Education

Jan 2021 - Aug 2021

Digital Society School

Digital Transformation | Traineeship

Nov 2020 - Nov 2021

SheCodes

Software Engineering | License

Sept 2015 - Jun 2019
